

# NEXUSEAL 2X

Multi-Fuel Marine Butterfly Valve

## ALTERNATIVE FUELS CHANGED THE REQUIREMENTS.

WE CHANGED THE VALVE.  
NEXUSEAL 2X™ is new — but its core technology is proven.

The new modular platform builds on KLINGER Westad's long-standing marine valve expertise, combining decades of cryogenic experience from CRYOSEAL 2X™ with the proven SCORPIO 2X™ platform trusted in demanding LPG and ammonia applications.

## PROVEN TECHNOLOGY. ENGINEERED FOR A MULTI-FUEL FUTURE

NEXUSEAL 2X™ builds on the core technology behind KLINGER Westad's established marine valve portfolio.

It draws on the LNG sealing expertise developed through CRYOSEAL 2X™ and the proven technology behind SCORPIO 2X™, building on decades of experience in demanding marine applications including LPG and ammonia.

The result is a new multi-fuel valve platform founded on decades of marine experience and proven sealing technology.

### Specifications

|                  |                                               |
|------------------|-----------------------------------------------|
| Temp. range      | +200°C to -196°C                              |
| Pressure rating  | Designed for up to 25 bar                     |
| Size range       | DN100 - 300 (4" - 12")                        |
| Services         | Bi-directional marine multi-fuel applications |
| Valve technology | High-performance double offset                |
| End connection   | Flanged, welded, wafer and lugged options     |

*With NEXUSEAL 2X we took the best technologies from our current product range, and made a modular valve platform that perfectly fits the multi-fuel future of shipping. LNG today and ammonia tomorrow, no problem, the valve is designed to support multiple fuel options.*

**Ole Petter Christensen,**

R&D and Business Development Director, KLINGER Westad
